Skills

Core Java ●●●●○

Oracle ●●●●○

Microservices ●●●○○

Frame Works

Spring Boot

Spring MVC

Education

● Bachelor of Computer Application -5.9 CGP

Bharathiar university
2016-2019

● Higher Secondary -86%

RukamiAmmal Higher secondary school
2015

● SSLC -77%

Girls Higher Secondary school
2013

Java Software Developer with 2 years of experience in designing, developing, and maintaining software applications. Passionate about learning new technologies and continuously enhancing skills to deliver innovative software solutions.

Experience

● Junior Developer Oct 2022- Present
- Harness DigiTech

• Developed advanced algorithms for optimizing the packing of finished goods, incorporating features for ratio packing and solid packing, which enhanced packaging efficiency and reduced waste by 80%.

• Worked on OrderPlanning modules tailored to the specific requirements of the textile industry, enabling efficient handling of orders from initial receipt to production scheduling and ensuring timely delivery to buyers.

• Maintained real-time server operations to support uninterrupted ERP tools, including live server maintenance capabilities. This ensured continuous access to critical data and facilitated real-time decision-making throughout the production and packing processes.

• Specializing in Java/J2EE development, Microservices architecture, and API lifecycle management. Proven track record of designing and implementing scalable, high-performance software solutions in fast-paced environments.

• Advanced Debugging: Proficient in identifying and fixing software bugs using advanced debugging tools and techniques.

Technologies Used

Programming Languages & Frameworks:

• Java 8, Spring Boot, J2EE, JavaScript, HTML, XML, CSS, iText PDF

Architectures & Services:

• Microservices, API Design and Development, API Lifecycle Management, RESTful Web Services

Tools & IDEs:

• IntelliJ IDEA, Eclipse, Harness ERP

Databases:

• Oracle

● Developer Intern Aug 2022- Oct 2022
- Harness DigiTech

• Assisted in the development and customization of ERP modules.

• Conducted research on ERP best practices and emerging technologies.

• Gained experience in performance analysis, optimizations, and benchmark evaluations.
